	Zinc	0.02%
	Water soluble (Zn)	0%
	Zinc EDTA (Zn)	0.02%

Description

Nutrivant Booster is rich in Potassium which is a macronutrient essential for plant growth at the flowering stage so as to extract a higher fruit yield from a plantation. The formulation ensures there's no drying out of the flowers which fall off and reduce the crop yield. It also bolsters better fruit formation thus increasing the marketability of the crops.

Benefits

- \\ Increase flowering and fruiting
- \\ Reduce flower dropping and increase disease resistance
- \\ Increase nutrient use efficiency and uptake

How to use

To be used for Foliar applications

- 1 Add water to the fertilizer
- 2 spray on leaves

Application rates

Minimum Avg	1kg/acre
Maximum Avg	2kg/acre

Dose your irrigation water with this solution, adjusting according to your crops' conductivity or ratio requirements. Trial first on a small scale before changing the rate, or any other variables, as circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results

Attention

Contact your ICL advisor for more detailed advice. Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.
